

Asset Tokenization Engineering Services

At Relevantz, we harness cutting-edge blockchain technology to enhance financial institutions. We tokenize assets, including stocks and NFTs, to ensure tracking and regulatory compliance, ultimately bolstering their market standing.

What We Can Help With

We cover it all:

- ✓ Architecture
- ✓ Design
- ✓ Consulting

We craft custom blockchain solutions with Web3 features, seamlessly integrated into your existing systems. Our main focus is delivering robust solutions, with a special emphasis on financial services, guaranteeing top-tier security and compliance. We have proven experience in Asset Tokenization, Open Banking, and Data Analytics.

Asset Tokenization

- Issuance of digital tokens
- Access to non-standard asset classes like PE Funds, Real Estate, & NFTs
- Transaction friction reduction
- Transparent ownership tracking

Asset Classes

- Private Assets - Equities, Securities & Debts
- Fund Products
- Equities
- Bonds
- Treasuries

Asset Custody

- Consolidated view and management of traditional and digital assets
- Legal, risk, and regulatory framework integrations
- Contingency
- Rich feature sets and integrations

Asset Classes

- Cryptocurrencies - Bitcoin and Ethereum
- Digital Cash

Customer Success Stories

Tokenizing Bonds and Securities on a Private Ethereum Network

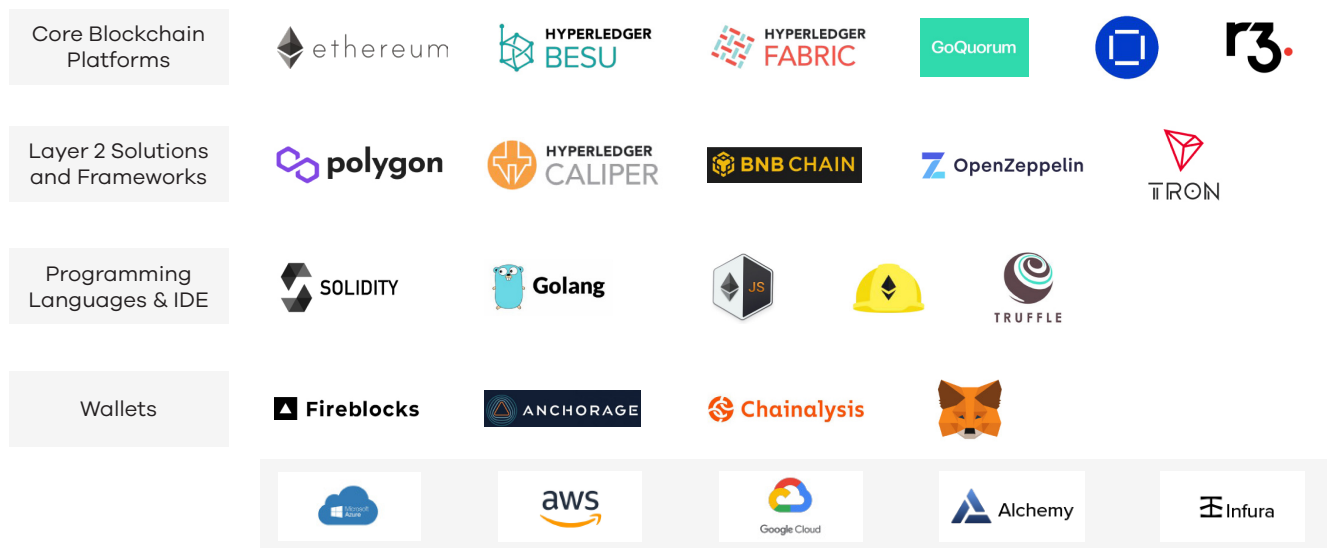

We helped a large investment bank overcome the challenges of expensive and outdated bond issuance by adopting a Private Ethereum network with smart contracts. The result: reduced costs, increased efficiency and security, and a unified view of traditional and digital assets.

Digital and Traditional Asset Custody via Secure Web3 Platform

We helped implement a secure Web3 platform for a custodian bank facing rising demand for cryptocurrency custodial services. This innovation facilitated crypto asset transfers and withdrawals, pioneering a multi-asset custody platform, and cementing the bank's position as a financial innovation leader.

Our Tokenization Techstack

Our engineers are certified in the latest blockchain technologies and bring proven experience from diverse customer projects. Below is a high-level technology stack showcasing our digital assets and tokenization expertise:
